

Broad Goals

In conjunction with the Stepping Stones Child Care Centre Philosophy, the following goals have been developed to assist educators in the delivery of programs and the everyday provisions for children and families at the Service.

Our goals are to strive towards:

- A Service which acknowledges and strives to meet the individual child care needs of families in the wider community in a flexible and responsive approach.
- A Service which supports the encouragement and participation of parents, guardians and other relevant community members in planning and operational requirements.
- A Service that is inclusive of the whole community.
- A Service where staff are committed to our vision, philosophy and goals and the provision of quality care and education.
- A Service where creativity and innovation are reflected in the Child Care program.
- A Service where staff are encouraged to belong and work as a team.
- A Service which is a leader in the provision of quality children's services in the region.

Reviewed in consultation with staff and parent committee members, current at October 2010.
